

# » About ESA Renewables

ESA develops, constructs and operates projects throughout the US, Europe, Canada and South America. Our customer focus is based upon large commercial and utility scale consumers and providers. ESA has developed a strong team that has the ability to design and construct any size project. ESA's scope of work includes project development, financing, design and engineering, construction, commissioning, monitoring and operation and maintenance through the life cycle of each install.

## A Turnkey Solar Solution.

ESA Renewables, LLC (ESA) is a global turnkey solar solutions provider with experience in commercial and utility PV systems worldwide. Our expertise lies in engineering, procurement, construction, R&D, operation and maintenance, and a proprietary monitoring system developed internally.

ESA has offices in Spain, Italy, Chile, Puerto Rico, Canada, and in the US. ESA is one of the leading solar integration companies totaling over 500 installations and multi-megawatts of power currently installed. ESA and its partners offer benefits that help ensure a successful project and have capabilities that help bring ESA to the forefront of the solar industry.
